

西北地震学报 1998 年 20 卷总目次

第 1 期

含裂隙双相各向异性介质中的地震波传播 冯德益 聂永安 (1)

Rundle 模式地震的分叉结构及其爆发判据 李丁一 (9)

根据含超压气体裂隙震源模式讨论 P 波初动符号的分布 王智培 (14)

火山与地震的共性特征及有关问题讨论 刘武英 (21)

祁连山西段酒西盆地区阶地构造变形的研究 陈杰 卢演涛 丁国瑜 (28)

多种前兆观测数据的合成信息熵研究 王海涛 杨马陵 杨又陵等 (37)

地震综合前兆场建场方法初探 夏玉胜 梁子斌 蔡红卫等 (42)

地热湖合并与 1976 年唐山大地震 江灏 汤懋苍 (47)

聊古-1 井氦氩比区间概率信息量与地震的关系 张昭栋 张华 吴子泉等 (51)

江淮地震区整体稳定性和局部不稳定性及未来中强地震预报探讨 王铮铮 刘红桂 冯志生 (54)

共和 7.0 级地震前地下流体前兆的动态演化特征 刘耀炜 张元生 (59)

甘肃地区地震活动的某些特征及其意义 王周元 姬凤英 (65)

甘肃永登 5.8 级地震黄土震害特征及机理分析 齐吉琳 赵国武 张振中等 (70)

孕震条带识别的重整化群方法 白超英 (76)

利用地震矩张量反演汾渭断裂系现今运动学特征 王卫东 张兴忠 王平 (81)

起潮力作为地球演化的一种动力的探讨 骆鸣津 池顺良 (85)

苍山 5.2 级地震前临沂台深井地电异常 孟庆武 (91)

第 2 期

我国华北和西南地区两条新生地震构造带的初步研究 徐杰 王若柏 王春华等 (1)

联合利用走时与波形反演技术研究地壳三维速度结构(I)——理论与方法 张元生 李清河 徐果明 (8)

利用钻孔应变资料预报新疆伽师强震群 蒋靖祥 赖爱京 胡群等 (16)

新疆地区强震前地磁低点位移异常的特点及其与构造活动的联系 黄雪香 丁鉴海 张淑兰 (22)

磁暴二倍法预报唐山 7.8 级地震 张铁铮 (29)

广西地震活动与我国主要地震区(带)地震活动的相关分析 杨仕升 (36)

用大地形变判定强震危险区的指标体系及河西地区垂直形变场演化 崔笃信 江在森 王双绪 (43)

关于阿尔金北缘活动断裂带运动方式的转变机制的讨论 邢成起 张杰 吕德徽 (52)

地震灾害经济损失理论估计及初步讨论 张晓东 朱丽霞 (58)

1995 年永登 5.8 级地震灾害评估 马尔曼 王彦宾 周俊喜等 (62)

鄂尔多斯地块西缘定边-景泰地壳和上地幔电性结构分析 屈健鹏 朱佐全 杨国栋等 (70)

硬件中断方式下微机通信用于地震信息交换的探索 张苏平 王兰炜 郑卫平 (76)

编码遥控发送机的研制 豆耀华 (80)

短文

长江口以东海域 $M_s 6.1$ 地震前的地倾斜异常 钟羽云 余加虹 (88)

甘肃省地应力资料分析及近期地震趋势判断 张国英 杨国栋 (90)

* * * * *

中国华北地区大地震复发周期及迁移特征(英文) 王华林 张杰 李海泉等 (104)

第3期

- 用短临地震活动性资料探讨中强地震地点和时间的预报 秦保燕 (1)
- 永登 5.8 级地震前后剪切波分裂特征 张范民 李清河 荣代璐 (9)
- 地下流体异常性质定量判别方法与地震预报 张新基 张慧 (16)
- 唐山地震前后水氡变化率动态图象的特征分析 张素欣 王吉易 郑云贞 (22)
- 长波辐射时空序列剖面中震兆特征的研究 江志萍 王赞军 严英 (27)
- 兰州形变台潮汐形变观测结果与甘肃永登、天祝地震 常千军 张昱 周志宇 (33)
- 1990 年共和 7.0 级地震的发震构造讨论 陈玉华 张敏 张晓青等 (39)
- 联合利用走时与波形反演技术研究地壳三维速度结构(II)——应用 张元生 李清河 徐果明 (44)
- 地震作用下黄土斜坡的稳定性分析预测 黄雅虹 (52)
- 1927 年古浪 8 级大震破裂的三维数值理论模拟 侯康明 邓起东 刘百麓等 (59)
- 黄土地区场地的地震地面运动参数特征 石玉成 蔡红卫 孙崇绍 (66)
- 渭河断陷及邻近地区震源空间分布规律探讨 袁志祥 狄秀玲 丁榭玉 (73)
- 走滑型地震震源孕育的三维组合模式 刘顺 (79)
- 强震前 b 值与 $C(n)$ 值变化的对比研究 王继英 (83)

短文

- 梯度一波扰效应 郭增建 (88)
- 红河断裂北段土壤中断层气含量变化特征 颜 鷗 李如陶 李四海等 (89)
- 兰州市孔家崖断裂活动特征 王进宝 戴华光 丁伯阳等 (92)
- * * * * *
- 河西走廊榆木山前土壤发育特征及其随时间的演变关系(英文) 邢成起 梁晓鹏 张杰等 (104)

第4期

- 表面局部三维大地电磁曲线畸变校正——MT 畸变校正阻抗张量分解方法 王书明 (1)
- 云南扬子准地台区地壳浅部速度构造特征 胡鸿翔 冯永革 (12)
- 自组织临界现象在地震空间演化特征上的应用研究 兰从欣 郭大庆 石特临等 (18)
- 北祁连山东段活动断裂带的分段性研究 袁道阳 刘百麓 吕太乙等 (27)
- 以伽师地震为例试论临震预报的可能性与局限性 苏乃秦 杨马陵 (35)
- 利用人工神经网络理论对地震信号及地震震相进行识别 张范民 李清河 张元生等 (43)
- 四川北部及川甘青交界地区强震活动与趋势 江道崇 (50)
- 地震间隙图像与地震大趋势 王周元 何少林 彭伟荣等 (57)
- 甘肃附加应力场预测地震研究 李步云 (63)
- 地震水文地球化学数据管理系统的技术特点 王永忠 李荣峰 叶振民 (70)
- 陕甘宁晋地区黄土地震滑坡致灾距的初步研究 才树华 王兰民 袁中夏 (75)
- 青海省湟水盆地全新世活动断裂分布及其活动特征研究 涂德龙 王赞军 曾包红等 (83)

短文

- 静宁东峡泉水氡资料年动态及映震能力的评价 孙世清 张玉芳 (91)

学术争鸣

- 关于《毕奥理论中 3 个基本参数显式解》一文的错误 丁伯阳 吴建华 (94)

NORTHWESTERN SEISMOLOGICAL JOURNAL

Vol. 20, 1998 CONTENTS

No. 1

- The Propagation of Seismic Waves in Cracked Two-phase Anisotropic Medium *Feng Deyi et al.* (8)
- The Bifurcation Structure of Rundle Mode Earthquake and Its Explosion Criteria *Li Dingyi* (13)
- Study on the Distribution of the First Motion Mark of P Wave by Using the Seismic Source Model of Crack Containing Hyper-pressure Gas *Wang Zhipei* (20)
- A Discussion on Common Characteristics between Volcano and Earthquake and Problems Concerned *Liu Wuying* (27)
- The Latest Quaternary Tectonic Deformation of Terraces of Jiuxi Basin in West Qilianshan Mountains *Chen Jie et al.* (36)
- Study on Synthetic Information Entropy of Multi-precursor Observing Data *Wang Haitao et al.* (41)
- Preliminary Study on the Method Building Comprehensive Seismic Precursory Field *Xia Yusheng et al.* (46)
- The Merger of Geothermal Vortexes and the Tangshan Earthquake in 1976 *Jiang Hao et al.* (50)
- Relationship between Information Amount of Interval Probability of Ratio between Nitrogen and Helium in Well Liaogu-1 and Earthquake *Zhang Zhuodong et al.* (58)
- A Discussion on Ensemble Stability and Local Unstability in Jiang-Huai Seismic Area and Prediction for Future Moderate Earthquake *Wang Zhengzheng et al.* (58)
- Dynamic Evolution Characteristics of Ground Fluid Precursors before the Gonghe $M_S7.0$ Earthquake, 1990 in Qinghai Province *Liu Yaowei et al.* (64)
- Some Characteristics of Seismicity in Gansu Region and Its Significance *Wang Zhouyuan et al.* (84)
- Analysis on Characteristics and Mechanism of the Seismic Damage in Loess in Yongdeng $M_S5.8$ Earthquake Region, Gansu Province *Qi Jilin et al.* (75)
- The Renormalization Group Method on Seismogenic Belt Recognition *Bai Chaoying et al.* (80)
- Inversion of the Present Kinematics Characteristics of Fen-Wei Fault Zone from Seismic Moment Tensor *Wang Weidong et al.* (84)
- A Discussion on the Tidal Force as One Dynamic Force of Earth Evolution *Luo Mingjin et al.* (90)
- Deep-well Geoelectricity Anomalies in Linyi Station before the Cangshan $M_S5.2$ Earthquake *Meng Qingwu* (94)

No. 2

- Preliminary Study on Two Newly-generated Seismotectonic Zones in North and Southwest China *Xu Jie et al.* (7)
- Combined Inversion Technique to Study 3-D Crustal Velocity Structure by Using Seismic Wave Travel-time and Wave Form (I) —Theory and Method *Zhang Yuansheng et al.* (15)
- Predicting the Strong Earthquake Swarm in Jiashi of Xinjiang Uygur Autonomous Region by Using Drill-hole Strain Data *Jiang Jingxiang et al.* (21)
- Relation between Characteristics of Geomagnetic Low-point Displacement Anomaly before Strong Earthquakes in Xinjiang Area and Tectonic Activities *Huang Xuexiang et al.* (28)
- Double Magnetic Storm Time Method to Predict the Tangshan $M_S7.8$ Earthquake in 1976 *Zhang Tiezheng* (35)
- The Correlative Analysis of Seismic Activity in Guangxi and in the Master Seismic Zones (Belts) of China *Yang Shisheng* (42)
- Index System for Deciding Strong Earthquake Risk Area by Geodetic Deformation Data and Evolution of Vertical Deformation Field in Hexi Region *Cui Duxin et al.* (51)
- Discussion on Change and Its Mechanism of Movement Forms of the Active Fault Zone along North Margin of Mt. Altun *Xing Chengqi et al.* (57)
- Theoretical Evaluation and Preliminary Discussion on Economic Damage of Seismic Hazard *Zhang Xiaodong et al.* (61)
- Hazard Evaluation of the Yongdeng $M_S5.8$ Earthquake in 1995 *Ma Erman et al.* (69)
- Analysis on Electrical Structure of Crust and Upper Mantle along the Western Border of Ordos Block *Qu Jianpeng et al.* (75)
- Research on Microcomputer Communication Used in Seismic Information Exchange by the Way of Hardware Interruption *Zhang Suping et al.* (79)
- The Manufacture of Coding Remote Control Transmitter *Dou Yaohua* (87)
- Research Report in Brief**
- Ground Tilt Anomaly Evolutionary Character before A $M_S6.1$ Earthquake in Sea on the East of Changjiang River Mouth *Zhong Yuyun et al.* (92)
- Ground Stress Data Analysis and Near Future Earthquake Trend Judgment of Gansu Province *Zhang Guoying et al.* (92)
- * * * * *
- Recurrence Periods and Migration Characteristics of Great Earthquakes in North China *Wang Hualin et al.* (93)

No. 3

- The Site and Occurrence Time Prediction of Medium and Strong Earthquakes Based on the Short-impending Seismicity Data *Qin Baoxian* (8)
- The Characteristics of Shear Wave Splitting before and after the Yongdeng $M_s 5.8$ Earthquake *Zhang Fanmin, Li Qinghe, Rong Dailu* (15)
- A Study on Method of Quantitatively Judging Ground Fluid Anomaly Character and Earthquake Prediction *Zhang Xinji, Zhang Hui* (21)
- Dynamic Pattern of Variation Rate of Radon Content in Groundwater before and after the Tangshan $M_s 7.8$ Earthquake *Zhang Suzin, Wang Jiyi, Zheng Yunzhen* (26)
- A Study on Anomaly Characteristics before Earthquakes in the Time-space Sequence Sections of Outgoing Longwave Radiation *Jiang Zhiping, Wang Zanjun, Yan Ying* (32)
- Analysis on Observation Results of Lanzhou Deformation Station before and after the Yongdeng and Tianzhu Earthquakes *Chang Qianjun, Zhang Yu, Zhou Zhiyu* (38)
- A Discussion on Seismogenic Fault for the Gonghe $M_s 7.0$ Earthquake in 1990 *Chen Yuhua, Zhang Min, Zhang Xiaoqing et al.* (43)
- Combined Inversion Technique to Study 3-D Crustal Velocity Structure by Using Seismic Travel-time and Waveform (II) —— Application *Zhang Yuansheng, Li Qinghe, Xu Guoming* (51)
- Analysis and Prediction for Stability of Loess Slope under the Effect of Earthquakes *Huang Yahong* (58)
- 3-D Numerical Simulation of Surface Rupture Caused by the 1927 Gulang $M_s 8$ Earthquake *Hou Kangming, Deng Qidong, Liu Baichi et al.* (65)
- Characteristics of Earthquake Ground Motion Parameters in Loess Areas *Shi Yucheng, Cai Hongwei, Sun Chongshao* (72)
- Discussion on the Regularity of Spatial Distribution of Earthquake Sources in and around the Weihe Downfaulted Basin *Yuan Zhixiang, Di Xialing, Ding Yunyu* (78)
- Three Dimensional Combination Model of Focal Development of the Earthquake of the Strike-slip Type *Liu Shun* (82)
- Contrast and Study on Variation of Seismometry Indexes b and $C(n)$ Values before Strong Earthquakes *Wang Jiyang* (87)
- Research Report in Brief**
- Effect of Gradient Disturbed by Wave *Guo Zengjian* (88)
- Variation Characteristic of Fault Product Gas Content in Soil along the Northern Part of Honghe Fault *Yan Kun, Li Rutao, Li Sihai et al.* (91)
- Active Characteristics of Kongjiaai Fault in Lanzhou City *Wang Jinbao, Dai Huaguang, Ding Boyang et al.* (94)
- * * * * *
- Soil Development Properties and Their Evolution with Time in the Piedmont of the Yumushan Mountains of the Hexi Corridor *Xing Chengqi, Liang Xiaopeng, Zhang Jie et al.* (95)

No. 4

- The Correction of Magnetotelluric Curve Distortion Caused by Surficial Local Three-dimension Inhomogeneities: the Impedance Tensor Decomposition Technique for the Correction of MT Curves Distortion *Wang Shuming* (11)
- The Characteristics of Velocity Structure in Shallow Part of the Crust in Yangtze Paraplatform Region of Yunnan Province *Hu Hongxiang, Feng Yongge* (17)
- The Study on Seismic Spatial Characters by Using the Self-organized Critical Phenomenon *Lan Congxin, Guo Daqing, Shi Telin et al.* (34)
- Study on the Segmentation in East Segment of the Northern Qilianshan Fault Zone *Yuan Daoyang, Liu Baichi, Lu Taiyi et al.* (34)
- Taking Jiashi Earthquake as an Example to Discuss the Possibility and Limitation of Impending Earthquake Prediction *Su Naiqin, Yang Maling* (42)
- The Seismic Signal and Phase Recognition by Using Artificial Neural Network Theory *Zhang Fanmin, Li Qinghe, Zhang Yuansheng et al.* (49)
- Research on the Activity Trend of Moderately Strong Earthquakes in the North of Sichuan Province and Its Vicinity *Jiang Daochang* (56)
- The Earthquake Interval Patterns and Seismic Major Trend *Wang Zhouyuan, He Shaolin, Peng Weirong et al.* (62)
- Predicting Earthquakes Based on the Change of the Additional Stress Field in Gansu *Li Buyun* (69)
- Technical Characteristics of the Seismic Hydrogeochemistry Database Management System *Wang Yongzhong, Li Rongfeng, Ye Zhenmin* (74)
- A Preliminary Study on the Seismic Landslide Distance in the Shaanxi-Gansu-Ningxia-Shanxi Loess Region *Cai Shuhua, Wang Lanmin, Yuan Zhongxia* (82)
- Study on Distribution and Activity Characters of the Holocene Faults in the Huangshui Basin, Qinghai Province *Tu Delong, Wang Zanjun, Zeng Baohong et al.* (90)
- Research Report in Brief**
- Evaluation on Reflection Earthquake Ability and Annual Dynamic Change of Radon in Groundwater of the Dongxia Spring in Jingning, Gansu *Sun Shiqing, Zhang Yufang* (93)
- Academic Contention**
- On Mistakes about 'Manifest Expressions of Three Basic Parameters in Biot Theory' *Ding Boyang, Wu Jianhua* (99)
